## Creating the Extraordinary Organization (CEO) *through* Total Quality Management (TQM)

### CEO *through* TQM

#### Objective:

Learn, from a senior management viewpoint, the principles, the mechanisms and the methods which lead to great organizational performance.

Your organization may have already won the Deming Prize or other prestigious prizes and awards. Or you may not have.

Whatever that may be, do you consider your business to be a remarkable performer already?

Or do you believe that you have problems which come in the way of your company becoming truly exceptional?

If you have a burning desire to create an extraordinary organization, and if you are willing to embrace new paradigms in management, then this program is for

# YOU

#### About Us

**Indian Society for Quality (ISQ)** was established as a Not-for-Profit Society with the objective of providing a national forum for interaction among quality professionals. The society acts as a catalyst and facilitation body for exchange of information and experience regarding Quality Management principles, technology and practices. Its mission is to pursue quality for prosperity. (Visit [www.isqnet.org](http://www.isqnet.org)).

Towards its objectives, ISQ has instituted many awards to recognize outstanding contributions by industry leaders, business professionals, TQM promoters in quality bodies and TQM counsellors who have selflessly contributed to the quality movement in India through their leadership and knowledge. The flagship event of ISQ is its Annual Conference where awards are presented, and illustrious speakers from India and overseas are invited. As a member of Asian Network for Quality (ANQ) ISQ has been involved from the very outset and represented on its Board. ISQ is the face of India overseas in the world of quality.

#### Who should attend

Promoters,  
Managing Directors,  
Presidents,  
CEOs, COOs,  
Division heads,  
Business heads  
or  
Function heads of  
large businesses in  
manufacturing  
or services.

## Does your organization have some of these troubles?

1. Do your customers rate your quality below that of competition, in some important respects?
2. Do you have warranty or customer claims and complaints that have persisted over years, defying solutions?
3. Do you have initial troubles with new products or models after you launch them?
4. Do you find you are not always able to meet customer demand regularly and on time?
5. Have you missed out on formulating a vision; and if you do have a vision, do you find your people not quite aligned to or inspired by it?
6. Do you find it hard to involve your managers in executing strategies in a coordinated manner?
7. Do you sometimes wonder if you have got the correct fix on some figures reported – such as errors, rejects, rework, breakdowns...? Are data mistaken, or even fudged?
8. Do you feel that you are capable of meeting specifications but there are inconsistencies batch to batch?
9. Are your production, sales, or collections skewed towards the end of the month/quarter/year?
10. Have you found a new vendor being approved, but the first bulk supplies were problematic?
11. Do your new projects take a long time to stabilize and break free of 'teething troubles'?
12. Do your investment projects fail to yield the promised returns and volumes?
13. Has a new equipment or new source of material (imported?) proved troublesome?
14. Does your product development take too long, or have many initial defects?
15. Are some or all of your workers/associates reluctant to participate in group or improvement activities?
16. Are new workers the source of some of your quality troubles?
17. Is your productivity dependent quite a bit on settlements with the labour union?
18. Do you find that your people are often engaged in firefighting?
19. Are working conditions in your facilities not quite well organized, or clean or safe?
20. Do you find that some of the training you provide your employees is not quite useful?
21. Do you think your departments tend to work in silos and not cross-functionally enough?
22. Do you find improvements you made sliding back sometimes?
23. Do you find that your people complain that their roles are not clear, nor their objectives and performance indicators?
24. Do you hear rumblings that there are too many initiatives or that management priorities are often shifting?
25. Do you wish sometimes that there was better teamwork in your organization?

We all look at the World with our own **paradigms**. Some of these work against us. Here are some examples of paradigms. When we acquire new paradigms we look at the world differently.

1. People are motivated by money, they perform better when rewarded financially.
2. The individual is largely responsible for his performance in the organization.
3. Workers are responsible for productivity.
4. Performance of individuals in organizations follows a bell curve and the lower outliers are 'deadwoods' who must be removed.
5. In general, people resist setting tough goals for themselves
6. What is not measured cannot be managed.
7. Customers are important, but profit is the primary goal of a business.
8. We must have more modern machines to produce quality at low cost.
9. We shouldn't ask our managers how they would achieve their targets as long as they achieve them.
10. We cannot get good prices for materials or parts unless we have multiple suppliers.

**If some of these are your paradigms too, would you like to re-examine them, even replace them with some new ones?**

**Mr. N. Ramanathan**

## **The Faculty:**

This program is designed and delivered by N. Ramanathan, 72, known as Ram to friends. Ram has a degree in Mechanical Engineering and did his Masters from IIM, Ahmedabad (1969). He has 50 years of experience in industry, and in teaching and counselling. This two-day course has a senior and top management focus.

In his career, Ram has worked in Marketing, Production, Product Development, Quality Assurance and HR. He has been in the quality field for thirty years, learning initially from his six-year stint as the head of the joint venture company SRF Nippondenso, near Delhi. He subsequently helped SRF win two Deming Prizes.

Ram has received awards internationally for his work, as well as receiving the Dronacharya Award in 2018 by ISQ for his contributions to teaching and counselling on quality. Ram has been associated with eleven successful Deming Prize challenges, and has taught and advised Ashok Leyland, Ceat, SRF, Indus Towers, JSW, Mahindra group of companies, Tata Quality management Services, Tata Steel, and other organizations. Ram is ranked Academician in the International Academy for Quality and serves on its Board, while also chairing its think tank on Quality in Planet Earth Concerns. He has been a founder member of ISQ, and has been on the Board of Asian Network for Quality. He is past chairman of the National Accreditation Board for Certifying Bodies (NABCB), and has in the past chaired the TQM Technical Committee of CII for seven years. Ram has been keynote speaker and has authored numerous international papers in the field of quality.

# Glimpses of Program Content

1. What is TQM, or Quality-based Management (QBM)?
2. What is Quality?
3. How must senior management use data?
4. How to develop a strategic vision?
5. How to set strategic milestones and deploy annual directions?
6. What are the tasks of senior management? What are they not?
7. How to develop products that satisfy customers and society
8. How to manage quality that satisfies customers and society
9. How to organize for and manage for deliveries that satisfy customers?
10. How to manage costs and profits?
11. How to clarify roles, objectives and KPI for everyone?
12. How our paradigms of people cause harm?
13. How to develop willingness and participation of everyone?
14. How to organize for and inculcate cross-functional cooperation?
15. Making improvements – the TQM Way. What not to do.
16. How to set up mechanisms for improvement activities?
17. The profound meaning of TQM and its principles, its counter-intuitive paradigms.
18. Structuring for, and disseminating TQM.
19. What is organizational performance?
20. Transformation for creating the extraordinary organization and challenging Awards.
